SHIMA SEIKI Reborn

SHIMA SEIKI Press Information **FOR IMMEDIATE RELEASE**

SHIMA SEIKI to Exhibit at Expotextil Perú 2026

Leading flat knitting solutions provider SHIMA SEIKI MFG., LTD. of Wakayama, Japan, in cooperation with its Peruvian sales representative STT PERU INNOVA S.R.L., will exhibit at the upcoming Expotextil Perú 2026 show in Lima, Peru next month.

SHIMA SEIKI will be promoting its innovative knitting technology to the Peruvian market with its SVR®123SP computerized flat knitting machine. Featuring a loop presser bed mounted above the rear needle bed SVR®123SP is capable of inlay technique for producing unique, value-added hybrid knit-weave fabrics. The machine also features such SHIMA SEIKI innovations as DSCS® Digital Stitch Control System, Rapid Response R2CARRIAGE® system, spring-type moveable sinker system, stitch presser, yarn gripper and cutter and takedown comb. Made-in-Japan quality, reliability, productivity, user-friendliness and cost-performance all combine to satisfy the high expectations not only of the world's fashion industry but also of various fields such as industrial materials. SVR®123SP at Expotextil Perú furthermore features the i-Plating® option, capable of alternating yarn colors in any pattern, producing jacquard-like designs using thin and lightweight plain jersey stitch. Plating can be performed within the same course and for individual needles for even greater diversity in knit design.

In addition to machine technology, presentations will be made on SDS® KnitPaint-Online knit software, the proven software used by knitting companies across the globe to create knitting data for programming SHIMA SEIKI computerized flat knitting machines. Previously available only as part of SHIMA SEIKI's SDS®-ONE APEX series all-in-one design system, with SDS® KnitPaint-Online, KnitPaint software becomes available as standalone software that carries over the same familiar KnitPaint functions, but enhanced with basic planning and design functionality as well.

Exhibition Details

Name:	Expotextil Perú 2026
Date:	Thursday, 5th - Sunday, 8th November 2026

SHIMA SEIKI Press Information

About SHIMA SEIKI

Company Name: SHIMA SEIKI MFG., LTD.

Established: 1962

President: Mitsuhiro Shima

No. of Employees: 1,256

Headquarters: Address: 85 Sakata Wakayama 641-8511 JAPAN
Telephone: +81-(0)73-474-8210 (Joint Sales Division)
Facsimile: +81-(0)73-474-8280 (Joint Sales Division)
URL: https://www.shimaseiki.com/

Core Business: Development, manufacture, sales and service of WHOLEGARMENT® knitting machines, computerized flat knitting machines, glove and sock knitting machines, computer graphic apparel design systems, apparel CAD systems, computerized fabric cutting machines (CAM) and other related peripherals.

Company Profile: SHIMA SEIKI MFG., LTD. of Wakayama, Japan is a leading manufacturer in the computerized flatbed knitting machine industry. With complete systems integration from planning, production to sales promotion and retail sales, SHIMA SEIKI has been dedicating its products and services to the knitting industry worldwide through the latest in computerized knitting technology.

SHIMA SEIKI is also the pioneer in complete garment manufacturing technology—called WHOLEGARMENT®—wherein an entire knitted garment is produced on the knitting machine without the need for linking or sewing afterward. Since its commercial introduction in 1995, SHIMA SEIKI has been the undisputed leader in WHOLEGARMENT® knitting technology over 30 years of field experience and know-how, not to mention over 2,900 related patents and patents pending worldwide.

Meanwhile SHIMA SEIKI's SDS®-ONE APEX series 3D design system and APEXFiz® design software feature ultra-realistic knit simulation for creating virtual samples. Virtual samples minimize time, cost and material associated with the sample-making phase. Virtual samples can also be used to gauge consumer response to items before going to market, effectively realizing production based on demand forecasting. Inventory can therefore be optimized to minimize leftover stock, realizing smart, speedy and sustainable production.
