# Graphics One Premieres an Array of New Products at Impressions Expo

**January 21-23, 2022, Long Beach, California – Booth 1839**

**SUNNYVALE, Calif., January 12, 2022** – On January 21, 2022, at the Long Beach Convention Center, Graphics One will premiere an array of new products including new ink, new software, new systems, new printers and new finishing solutions. The array of new products that will be on display include the following:

- **GO ColorMate SP RIP Software**
- **GO ColorMate TT RIP Software**
- **GO TransferMate DTF System**
- **GO TransferMate DTF Ink**
- **GO TransferMate DTF Film**
- **GO Transfer DTF Powder**
- **GO Xpress C-1200 Calendar**

### **GO ColorMate RIP**

With the first advanced Mac-based RIP for a variety of vertical markets, GO's new ColorMate RIP family expands new markets for users of the Apple Macintosh. GO will introduce different versions for different applications including screen print, toner transfer, dye sublimation, direct-to-garment and direct-to-film.

### **GO TransferMate DTF System**

One of the fastest-growing new printing technologies is direct-to-film technology and Graphics One will be a major participant. The technology was developed for fabric transfers and involves printing a special pigment ink to a coated PET film. While the ink is still moist, the special adhesive powder is applied to the ink. The film, ink and powder are cured (dried) using the hover capabilities of a heat press. Once the ink is dry, the film is placed on the garment and the transfer is made in a normal manner using a heat press.

The first system to be shown by Graphics One during the Impressions Expo will be the TransferMate DTF-814 which prints with CMYK colors and is meant for use with white and light substrates. GO has a family of DTF products in the pipeline including systems with CMYKW for black, dark and colored substrates to be introduced at a later date. The new components of the systems are as follows:

### **GO TransferMate DTF Ink**

GO TransferMate DTF Ink is a pigment ink developed in the U.S. by Prism Inks specifically for DTF applications. With advanced pigment technology, GO's DTF ink durability rivals or exceeds DTG ink. Developed specifically for Micro TFP print heads, the DTF ink comes standard in 140 ml bottles and is available in CMYK colors.

### GO TransferMate DTF Film

GO's DTF Film was developed specifically for use with GO DTF Ink. This combination of ink and film provides incredibly detailed images down to 5% coverage. Additionally, no ink is wasted with 100% released from the film to the substrate with little dot gain for sharp and dense images.

### GO TransferMate DTF Powder

Like the other components in our turnkey system, the GO TransferMate DTF powder creates long-term adhesion to the substrate that promotes long-term washability without major degradation. The DTF powder is available in 2.2-pound bottles.

### GO Xpress C-1200 Rotary

Making its first appearance in Long Beach, the 47-inch 3-in-1 oil-based calendar is the smaller version of the GO Xpress C-1700 Calendar. This high-performance calendar is just easy for everyone: easy to set-up, easy to use and easy to support. This unit will be shown working with both the Mutoh XPJ-1642WR and the Mutoh RJ-900X.

### Mutoh XPJ-1642WR

The new Mutoh XPJ-1642WR will make its first debut at the Impressions Expo. This 64-inch, four-color printer features two brand new ultra-wide Mutoh AccuFine piezo variable drop print heads, installed in a staggered configuration, the XPJ-1642WR delivers exceptional print quality at higher production speeds at reasonable pricing.

The Mutoh unit will be shown in conjunction with GO's new Xpress C-1200 Rotary Calendar.

### Please Join Us

We look forward to seeing all our business partners in **Booth 1839** during January 21-23, 2022, at the Impressions Expo in Long Beach, California.
