

Lectra joins Euronext Tech Leaders, the new stock market index for European technology securities

Paris, June 20, 2022 – Lectra, whose connected industrial equipment and software facilitate the digital transformation and Industry 4.0 transition of fashion, automotive and furniture companies, announces its selection for the new Euronext Tech Leaders stock market index. This brings Lectra into the community of top European technology leaders identified by Euronext as innovative and high-growth companies.

The new Euronext Tech Leaders market index, launched on June 7, comprises 100 European technology companies listed on the Euronext markets, which meet various performance and growth criteria. With the launch of this initiative, Euronext aims to offer better visibility and new services to selected European technology leaders.

Lectra is one of the 41 French companies that are now members of Euronext Tech Leaders. The company, founded in 1973 on a close relationship with fashion industry players, has also for the last three decades worked globally with automotive equipment and furniture manufacturers. In its three strategic markets, Lectra sells connected equipment that optimizes the cutting processes of fabric, leather and other soft materials used by manufacturers, and markets software and services that streamline their production processes while enabling them to be more agile and make considerable material savings.

In fashion, through the use of market data – made accessible and exploitable by the Internet of Things, the cloud, artificial intelligence and big data – Lectra’s software solutions also enable a better understanding of consumers’ behavior. They therefore facilitate strategic decision-making for brands, manufacturers and distributors at the key steps in the value chain of design, production and distribution. In this industry, the impact of Lectra’s solutions on reducing material consumption is even greater because it takes effect as early as the garment design stage.

Technology and innovation are therefore at the heart of Lectra’s strategy, with the company aiming to become a key player in Industry 4.0 in its strategic markets by 2030.

“We are delighted that Lectra is joining the Euronext Tech Leaders index”, says Daniel Harari, Lectra’s Chairman and CEO. “Its entry into the community of the 100 European technology growth companies is a significant recognition of our contribution to the development of Europe’s technologies sector. We are all very honored. It affirms our decision to combine our industry expertise with our capacity for innovation to promote our customers’ success by using technology to help them solve the many challenges that they face”.

About Lectra:

As a major player in the fashion, automotive and furniture markets, Lectra contributes to the Industry 4.0 revolution with boldness and passion by providing best-in-class technologies.

The group offers industrial intelligence solutions - software, equipment, data and services - that facilitate the digital transformation of the companies it serves. In doing so, Lectra helps its customers push boundaries and unlock their potential. The group is proud to state that its 2,500 employees are driven by three core values: being open-minded thinkers, trusted partners and passionate innovators.

Founded in 1973, Lectra reported revenues of 388 million euros in 2021 and is listed on Euronext (LSS).
